Questions in focus for the seminar paper related to lecture 1) Brain development, deviation and plasticity (LR), thus, questions to be presented and discussed at the following seminar (10/11/UmU) at (12/11/LiU).

You may choose to answer/elaborate on one of the questions, or you may include both in your expected two pages written seminar paper.

1. Describe different scientific findings regarding the influence exert by environment enrichment on brain plasticity (please give examples and/or discuss this findings in relation to your own research questions and/or implications).

2. Is there anatomical and functional evidence for organizational changes of the brain in a chosen developmental disorder (e.g. cerebral palsy, autism, ADHD)? What are the possible mechanisms driving the plasticity (if present)’?”
